

Smatv System Installation and Services

AL MAKKAH INFORMATION TECHNOLOGY AND SERVICE

we specialize in designing and installing advanced **SMATV (Satellite Master Antenna Television)** systems tailored for residential buildings, hotels, hospitals, and commercial properties. SMATV systems allow centralized distribution of satellite TV signals to multiple units without the need for individual dishes, ensuring a clean and efficient solution.

Centralized Dish System: A single satellite dish receives signals and distributes them to multiple users through a unified system.

Headend Equipment: Professional-grade hardware that processes, converts, and manages TV signals for smooth transmission.

Signal Distribution Network: High-quality cabling and splitters ensure strong, interference-free signals to all connected units.

Channel Customization: Create custom channel packages suited to

Integration with IPTV & OTT: SMATV systems can be integrated with modern IPTV services for a more comprehensive entertainment offering.

Scalable Design: Easily expandable to accommodate more users or new channels without overhauling the system.

Low Maintenance: Durable, professionally installed systems that require minimal maintenance and deliver long-term reliability.
